

**Quality Network Meeting: 14 October 2008**  
**Summary notes**

**Collaborative Partners Register**

On the collaborative partners register there is a significant number of programmes with no students registered on them. Please would you check the details for your faculty and if this is the second year in which a programme in your area has failed to recruit, please would you consider, in consultation with the relevant faculty staff, whether these links should be discontinued.

For your information, I have attached a copy of the register, which contains numbers based on data from QLS for 2007/2008.

**PS1s**

It is a requirement that PS1s are available for all programmes for consultation by students. These should be available via the website. Please check the availability for students of the PS1s for programmes within your faculty and make available those which are missing.

**Audit Website**

The Audit website is now up and running. Please consult this regularly and let Peggy and Julie have any comments you might have about its content - particularly if there is something stated there that does not accord with faculty practice.

**PARM/AME activity**

The Auditors will look in particular at PARM and AME activity which has taken place in the recent past. Please ensure that issues arising from PARM and AME, in particular outstanding conditions arising from PARM events are not allowed to continue unresolved. Obviously CASQE staff will be actively involved in this activity also.

**Next Network meeting**

The next meeting of the network will take place on Tuesday 18th Nov 2008 on the All Saints Campus. The meeting will commence at 14.00 and will follow our established format. We agreed that following the "general" first half of the meeting, Rob and Rachel will give a presentation on the Student Voice project.
