**** If you have a TV set operable on mains electricity you require a licence, information about this is available by ringing 0300 7906138 between 8.30 a.m. and 6.00 p.m.**

When you pay your accommodation fees you become a beneficiary of the Manchester Metropolitan University halls of residence block insurance policy. This provides basic cover for your personal possessions up to £4000; an information leaflet giving details of the cover is included in your welcome pack and is also available from the Accommodation/Welfare Office.

The electricity supply in the UK is 240 V, with square three-pin plugs. Within the UK you need to use British Standard 3 flat blade plugs (technically known as BS 1363), shaver sockets in bathrooms are 2-pin 220 V. If you are bringing electrical equipment from overseas you will need to check that any electrical products can work at this voltage **and** you may need to purchase an adapter, these are available from our SU shop on the campus or at the airports and from larger supermarkets.
