About Us

We are a great modern university, in a great global city, here to make an impact on Manchester, our nation and beyond.

We have a driving ambition to discover and disseminate knowledge, and make higher education accessible and beneficial to as many people as possible.

As a higher education provider, we have a major role to play in enabling students and staff to develop the skills and attributes to respond to global challenges. Our students are our future leaders and decision makers, and will be integral in the global response to the threat of climate change.

Manchester Metropolitan University (Manchester Met) is one of the largest campus-based Higher Education providers in the UK.

We offer over 1,000 undergraduate and postgraduate courses and professional qualifications to a diverse student body, attracting students from across the UK, Europe and international communities.

We pride ourselves on training the future talent of the region, with nearly 70% of our graduates staying and working in the North West.

ENCOURAGE THE USE OF **SUSTAINABLE MODES OF TRANSPORT** THAT MINIMISE ENVIRONMENTAL IMPACT

**EMBED SUSTAINABLE DESIGN PRINCIPLES**

**INVEST IN GOODS AND SERVICES THAT CONSIDER WHOLE LIFE COSTS**

**50% REDUCTION** IN CARBON EMISSIONS BY 2020

**PREVENT, REDUCE, REUSE, AND RECYCLE**

**REUSE AND RECYCLE 60% OF WASTE** BY 2020

**PROTECT AND ENHANCE BIODIVERSITY** ACROSS THE UNIVERSITY

**SKILLS, KNOWLEDGE AND ATTRIBUTES FOR SUSTAINABLE DEVELOPMENT**

**BUILDING RESILIENCE** TO WEATHER AND CLIMATE CHANGE RISKS

**EFFECTIVE AND EFFICIENT** WATER MANAGEMENT SYSTEMS

**25% REDUCTION** IN WATER CONSUMPTION BY 2020

**MAINTAIN AND CONTINUALLY IMPROVE** OUR ENVIRONMENTAL MANAGEMENT SYSTEM

**DRIVING INNOVATIVE SOLUTIONS** TO CLIMATE CHANGE AND SUSTAINABLE DEVELOPMENT CHALLENGES

**SUPPORTING SUSTAINABLE PROCUREMENT PRACTICES** ACROSS THE UNIVERSITY AND BEYOND

**CLIMATE LEADERSHIP** BY INVESTING RESPONSIBLY

**RENEWABLE AND LOW-CARBON** ON-SITE ELECTRICITY GENERATION
The environmental sustainability commitments and principles set out will be embedded through the formal and informal curriculum, research, through access to professional development, through our estates and operations, and will be part of our culture and organisation leadership.

2020/21 Vision

**BY 2020/21 WE WILL HAVE**

- **MINIMISED** our environmental impacts via the implementation of our environmental management framework ISO 14001:2015.
- **BUILT** social, intellectual and environmental capital through our research, knowledge exchange and built estate.
- **DEVELOPED** intelligent campuses, where an efficient and effective estate and public realm meets existing and future user needs and expectations.
- **ENHANCED** the student experience and enriched community life through the quality of the University estate.
- **ESTABLISHED** lasting partnerships to create efficiency and knowledge gains in the journey towards becoming a sustainable university.
- **DRIVEN** innovative solutions to climate change and sustainable development challenges through our collaborative research and knowledge exchange.
- **EMBEDDED** the principles of Education for sustainable development (ESD) into the whole ‘university experience’ for staff and students.

About the Strategy

We are a leading award winning university for sustainability and must ensure our business activities reflect this.

The development of a new Manchester Metropolitan University Strategy in 2014 enabled us to articulate our vision and ambition to discover and disseminate knowledge, and make higher education accessible and beneficial to all those with the passion and ability to succeed. In recognition of the importance we place on sustainability, it has been formalised as one of five strategic approaches within the University strategy.

Understanding our potential contribution in the future to the improvement or deterioration of economic, environmental and social conditions, developments and trends at the local, regional and global levels is imperative.

The Environmental Sustainability Strategy sets out how the University will demonstrate responsible environmental practice, how we will mitigate, adapt, and be part of the solution to Climate Change, and contribute towards sustainable development through our teaching, learning and research, and our estate and operations.

The development of a new Manchester Metropolitan University Strategy in 2014 enabled us to articulate our vision and ambition to discover and disseminate knowledge, and make higher education accessible and beneficial to all those with the passion and ability to succeed. In recognition of the importance we place on sustainability, it has been formalised as one of five strategic approaches within the University strategy.

Understanding our potential contribution in the future to the improvement or deterioration of economic, environmental and social conditions, developments and trends at the local, regional and global levels is imperative.

The Environmental Sustainability Strategy sets out how the University will demonstrate responsible environmental practice, how we will mitigate, adapt, and be part of the solution to Climate Change, and contribute towards sustainable development through our teaching, learning and research, and our estate and operations.

About the Strategy

We are a leading award winning university for sustainability and must ensure our business activities reflect this.

The development of a new Manchester Metropolitan University Strategy in 2014 enabled us to articulate our vision and ambition to discover and disseminate knowledge, and make higher education accessible and beneficial to all those with the passion and ability to succeed. In recognition of the importance we place on sustainability, it has been formalised as one of five strategic approaches within the University strategy.

Understanding our potential contribution in the future to the improvement or deterioration of economic, environmental and social conditions, developments and trends at the local, regional and global levels is imperative.

The Environmental Sustainability Strategy sets out how the University will demonstrate responsible environmental practice, how we will mitigate, adapt, and be part of the solution to Climate Change, and contribute towards sustainable development through our teaching, learning and research, and our estate and operations.
About the Strategy

The Environmental Sustainability Strategy 2014–2020, sets out the objectives we must work towards to enable the delivery of our environmental sustainability policy, setting out the key actions we will take, along with how we will monitor and review our progress towards our policy aims.

This Strategy is reviewed on an annual basis. Amendments to objectives, targets and KPIs are highlighted across the document.

Sustainable Development at Manchester Met

As a Higher Education provider, we have a major role to play in supporting students and staff to develop skills and attributes to respond to global challenges. Our students are our future leaders and decision makers, and will be integral in the global response to the threat of climate change.

In 2015, with the 2030 Agenda for Sustainable Development, the world’s leaders set out on an ambitious path to end poverty, fight inequality and injustice, and protect the planet. The Member States of the United Nations unanimously agreed upon the 17 Sustainable Development Goals (SDGs), making them the world’s agenda for sustainable development.

The success of the SDGs is dependent upon contributions and collaborative efforts by all parties in society across the world, including the Higher Education (HE) sector.

It is imperative that universities understand their current and potential contributions towards the 2030 agenda for sustainable development. Universities are in a unique position; we can influence societal changes by empowering, equipping and engaging our students – the future business leaders, decision-makers, people able to affect change – with the knowledge and skills that will progress towards achieving the SDGs, and global sustainable development beyond 2030. We can do this in many ways: through our estates and operations, other business activities, and through our learning, teaching and research activities.
Sustainable development depends upon society possessing the knowledge, skills and attributes, as well as the understanding and motivation to act on sustainable development issues and challenges.

At Manchester Met we are in a position to deliver Education for sustainable development (ESD) through a number of means – thereby equipping our students and staff with the relevant knowledge and skills to respond to future challenges, both in their personal and professional life.

Learning for a Sustainable Future takes a holistic approach to Education for sustainable development. It consists of activities undertaken in the formal and informal curriculum, through our research, and through professional development.

It is imperative that we minimise the adverse impacts of our activities and built estate, as well as contribute positively to the local community. We can do this through the creation of campuses that welcome the community, and that provide the facilities to support and encourage community education and cohesion.
Leadership and Governance

Leadership and Governance for sustainable development is critical if the University is to integrate a wide range of related issues into its values, culture, learning, teaching, research and other business activities.

A range of University boards and committees are responsible for strategic direction and support, oversight and implementation of the Environmental Sustainability Policy, Strategy and initiatives relating to sustainable development.

Find out more about University board and committee responsibilities as related to sustainable development in the Environmental Sustainability Policy.

DELIVERING OUR STRATEGY AND MONITORING

- We manage and control our environmental sustainability impacts through an Environmental Management System certified to ISO 14001:2015 standard, which provides a framework for establishing and improving our environmental performance.
- We will deliver, review and monitor this strategy through our Environmental Management System.

GOVERNANCE AND COMMUNICATING OUR PROGRESS

- The University’s Environment Strategy Group advises the University Executive Group on the strategic direction for the Environmental Sustainability Strategy and its implementation encompassing education, research, internationalisation and Professional Services, aligned to the relevant United Nations Sustainable Development Goals.
- The Finance and Resources Committee consider, advise or determine, as appropriate, the University’s strategies and policies, and approves the Environmental Sustainability Strategy and Policy.
- Progress on the implementation of this strategy is reported in the annual Environmental Sustainability Statement.

RESOURCING THE STRATEGY

It is essential that the University commits to financially resourcing the implementation of the environmental sustainability strategy to deliver what we have set out in the strategy. The University commits an annual budget to resource staff, and to undertake a range of projects and activities integral to the delivery of the aims and objectives outlined in this strategy.

2020-2021 budget:

Mainstream staffing- £238,573
This includes staffing budgets for the activities listed below and does not include teaching and research staff.

Non-pay related activities- £319,145
This funds the delivery of each of the activities listed below.
- Biodiversity management
- Carbon and energy management
- Policy and strategy
- Staff and student engagement, development and informal learning
- Sustainable buildings
- Sustainable food
- Sustainable travel
- Waste and recycling management
- Water management

Environmental Education Fund- £50,000
The Environmental Education Fund resources our staff and student Carbon Literacy Programme, and is available to support suitable staff and student-led sustainability projects.
LEARNING FOR A SUSTAINABLE FUTURE

Our contribution towards sustainable development issues rests on graduates and staff who possess the

‘Knowledge and understanding, skills and attributes needed to work and live in a way that safeguards environmental, social and economic wellbeing’.

We understand that skills, knowledge and attributes for sustainable development are gained through the whole ‘university experience’ for staff and students; that is, through the formal and informal curriculum, through access to professional development, through the University’s estate and operations, through research and knowledge exchange, and organisational culture and leadership.

Learning for a Sustainable Future consists of activities undertaken in the formal and informal curriculum, our research, and our professional development.

OUR AIM

Support staff and students in gaining the knowledge, skills and attributes needed for sustainable development.

OUR OBJECTIVES

• Deliver, embed and enhance activities that develop knowledge, skills and attributes for a sustainable development amongst students
• Support professional development opportunities that equip staff with the knowledge and skills to embed Education for sustainable development (ESD), and support the sustainability commitments of the University
• Deliver effective communications that support knowledge, skills, and attributes for sustainable development and promote our reputation as a leading sustainable university

INDICATORS AND TARGETS

80% of students perceive they are gaining skills and knowledge to help understand sustainable development issues by 2020-21
At least 50% of staff receiving professional development opportunities that increase skills and knowledge for sustainable development by 2020-21^2
At least 80% of students and staff perceive Manchester Met as an environmentally sustainable university

^QAA & HEA, 2014
^Target reviewed in 2018
Manchester Metropolitan University occupies a large area of estate and has a role to play in enhancing biodiversity, protecting habitats, and in creating green corridors and engaging our staff, students and local community in its use. The University can link its estate to the student experience by utilising space as a ‘living laboratory’. Creating opportunities for research, learning and skills acquisition will not only act to enhance the student experience, but also improve the sustainability of the estate itself.

**OUR AIM**

Protect and enhance biodiversity across the University’s estate and promote its benefits for students, staff and the local community.

**OUR OBJECTIVES**

- Undertake ongoing university wide biodiversity audits to monitor priority habitats and species and inform the development of appropriate management, maintenance and conservation plans.

**INDICATORS AND TARGETS**

- Measure, maintain and report habitat and species diversity annually and by 2020-21.

- Promote the multifunctional benefits of our green space to staff, students and local community.

- Promote the use of university buildings to enhance habitat connections within and between campuses.

- Measure and report engagement opportunities annually and by 2020-21 for our staff, students and local community.

- Measure, maintain and report habitat connectivity annually and by 2020-21.
OUR AIM:

Reduce operational energy consumption in line with our energy targets and carbon emissions in line with our carbon targets.

CARBON AND ENERGY MANAGEMENT

The Higher Education sector in the UK is a large energy consumer and consequently it has an important role to play in reducing emissions and demonstrating leadership on energy management and carbon emission reduction.

Energy efficiency and management forms an important part of the University’s corporate commitment to institutional sustainability, and will ultimately determine our carbon emission reduction.

The University has set ambitious targets to reduce direct (scope 1 and 2), and monitor our indirect (scope 3) carbon emissions, and to improve the energy efficiency of its estate.

OUR OBJECTIVES

| • Reduce scope 1 and 2 carbon emissions | 50% reduction in carbon emissions by 2020-21 |
| • Reduce energy consumption | 50% reduction in gas and electricity consumption by 2020-21 |
| • Improve Display Energy Certificate (DEC) Rating of university buildings | Achieve average DEC rating of C or above on an annual basis and by 2020/21 |
| • Measure, report and reduce scope 3 carbon emissions | Measure and reduce Scope 3 emissions on an annual basis and by 2020/21 (further detail and reduction targets can be found in the scope 3 emissions report) |

ENVIRONMENTAL MANAGEMENT SYSTEMS

The implementation of an Environmental Management System (EMS) enables the University to reduce its environmental impact, increase operational efficiency and supports continuous improvement of our environmental performance. It also helps us to meet our sustainability goals and comply with environmental legislation.

The University is certified to the international standard ISO 14001:2015 for environmental management. We have developed an innovative approach to our EMS, covering our physical estate and operations, as well as Education for sustainable development in our teaching, learning, research and extra-curricular activities.

OUR AIM

Maintain and continually improve our Environmental Management System certification.

OUR OBJECTIVES

• Maintain ISO14001:2015 certification and continually improve the effectiveness of our EMS

INDICATORS AND TARGETS

• Maintain certification to ISO 14001:2015 and continually improve our EMS
The ways and means in which the University invests its funds have social, environmental and economic impacts. There is a powerful ethical argument for withdrawing investment from companies engaged in activities that contribute to the destruction of natural ecosystems, species extinction and climate change, and that are detrimental to health and well-being, or that contravene human rights law.

The University has an Ethical Investment Policy which demonstrates that when the University sets out to invest its funds it does so with due consideration for ethical, environmental, corporate governance and social issues. The Ethical Investment Policy is also embedded in the University Treasury Policy.

**ETHICAL INVESTMENT**

When investing our funds we will give due consideration for ethical, environmental, corporate governance and social issues in line with our Ethical Investment Policy.

<table>

<td>* Maintain compliance with the Policy and report progress on an annual basis and by 2020/21 *</td>
</tr>
</tbody>
</table>

The University’s activities affect the environment on a local and a global scale – we have a duty to protect the environment, prevent and minimise pollution and emissions and discharges and ensure that we comply with environmental legislation.

**POLLUTION PREVENTION AND LEGAL COMPLIANCE**

Prevent pollution by minimising emissions and discharges to air, land and water, and ensure compliance with all relevant environmental legislation and other mandatory obligations.

<table>

</tbody>
</table>

[^3]: Target reviewed in 2018
Alongside managing and reducing our impact on the environment, it is imperative that we increase the University’s resilience to climate change impacts.

The University will work to understand, develop and adapt our policies, procedures and infrastructure to respond to the challenges presented by climate change, and understand the risks that changes in climate present to the University, the wider community and to society.

**RESILIENCE TO CLIMATE CHANGE**

**OUR AIM**

Ensure the University builds resilience to weather and climate change risks.

**OUR OBJECTIVES**

- To ensure the University is testing its Emergency and Business Continuity Plans to respond to the impacts of severe weather and flooding.
- Develop and deliver training to staff ensuring the University is prepared for climate change risks

**INDICATORS AND TARGETS**

- Emergency plans tested every 18 months
- Training delivered by 2018-19

Manchester Met has a multi-million-pound annual expenditure on goods and services, which accounts for a significant proportion of the University’s indirect carbon emissions. The ways and means by which we procure goods and services have social, environmental and economic impacts.

The University can make an important contribution to local, regional and national sustainability targets by opting to make responsible procurement decisions.

**SUSTAINABLE AND ETHICAL PROCUREMENT**

**OUR AIM**

Consider the economic, social and environmental impacts and whole-life costs of purchasing decisions and take appropriate action.

**OUR OBJECTIVES**

- Improve sustainable procurement practice at the University

**INDICATORS AND TARGETS**

- Achieve level 4 of Flexible Framework by 2018-19 and maintain by 2020/21

\[^a\text{Target reviewed 2018}\]

\[^b\text{Target reviewed 2018}\]
The development of sustainable, efficient and intelligent buildings across the University is the strongest factor in determining our on-going energy costs and direct carbon emissions.

The University’s estates masterplan will transform and redevelop key buildings across the estate to support the highest quality research and teaching, and achieve challenging energy efficiency and sustainability standards.

**SUSTAINABLE BUILDINGS**

**OUR AIM**

Embed principles that will minimise the environmental impact of the University estate from design to occupation.

**OUR OBJECTIVES**

- Improve Energy Performance Certificate (EPC) ratings for New Builds
  - Achieve EPC rating of ‘B’ or above by 2020-21 or on completion of the building project

- Achieve BREEAM Rating for New Builds
  - Achieve BREEAM rating of ‘Excellent’ or above by 2020-21 or on completion of the building project

- Achieve SKA Certification for appropriate building refurbishment projects
  - Achieve ‘Silver’ SKA award by 2020-21 or on completion of the refurbishment project

**TRAVEL MANAGEMENT**

Our business travel, staff, and student commuting activities account for approximately 30% of our total carbon footprint.

Manchester Met is a large employer, and with a student population of 38,000, there are significant opportunities to support staff and students in making informed choices about the way they travel.

**OUR AIM**

Minimise the impact of staff and student travel and encourage the use of efficient modes of transport that reduce environmental impact, congestion and air pollution.

**OUR OBJECTIVES**

<table>
<thead>
<tr>
<th>INDICATORS AND TARGETS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manage the number of Manchester-based Single Occupancy Vehicle (SOV) journeys direct to campus</td>
</tr>
<tr>
<td>Increase the proportion of low emission vehicles in the University’s core vehicle fleet</td>
</tr>
<tr>
<td>Increase the uptake of staff journeys by active travel modes (cycling and walking)</td>
</tr>
<tr>
<td>Increase the uptake of student commuting journeys by active travel modes (cycling and walking)</td>
</tr>
<tr>
<td>Increase journeys to Manchester Campus made by public transport</td>
</tr>
</tbody>
</table>

**INDICATORS AND TARGETS**

- Maintain SOV rate of less than 20% by 2020-21
- 75% of vehicles low emission by 2020-21
- 19% staff journeys to Manchester Campus made by cycling or walking by 2020-21
- 67% student journeys to Manchester Campus made by cycling or walking by 2020-21
- 60% staff journeys to Manchester Campus made by public transport by 2020-21

6 7 8 9 10 11 12 Target reviewed, new objective set and new target set in 2018
Legislative, environmental and resource limitations act as strong drivers to improve waste management systems and performance.

We are committed to reducing our environmental impacts through waste minimisation, the maximisation of reuse and recycling, and by creating gains in resource efficiency. Coupled with the increasing cost implications associated with the disposal of wastes, the University must act to manage its wastes and resources to limit our environmental, social and financial impacts.

### WASTE AND RESOURCE MANAGEMENT

**OUR AIM**

Embed the principles of the waste hierarchy to prevent, reduce, reuse, recycle and dispose of our waste.

**OUR OBJECTIVES**

- Increase reuse and recycling (on-site)
- To divert waste from landfill

**INDICATORS AND TARGETS**

- 60% reuse and recycling rate by 2020-21
- Maintain 95% waste diversion from landfill (excluding waste from all building projects) by 2020/21
- Maintain 85% waste diversion from landfill (including waste from all building projects) by 2020/21

Water resources are under increasing pressure globally, where population growth and industrialisation are increasing demand for water and placing supplies under strain. At the same time, climate change is increasing rainfall intensity and coupled with urbanisation, is worsening flood risk in many areas.

It is important that the University uses water as efficiently as possible to reduce water stress and financial costs, and that it deploys systems to reduce the risk of flooding.

### WATER MANAGEMENT

**OUR AIM**

Effectively manage and reduce our mains water consumption across our estate and increase the deployment of sustainable drainage and flood prevention measures.

**OUR OBJECTIVES**

- Reduce total water consumption
- Reduce mains water consumption

**INDICATORS AND TARGETS**

- 25% reduction of total water consumption by 2020-21
- 35% reduction of mains water consumption by 2020-21
