

Responsible Futures Joint Statement of Intent

Manchester Metropolitan University and the Union are committed to working in equal and active partnership to maintain and progress our SOS-UK Responsible Futures Accreditation.

Responsible Futures is a whole-institution approach to embed sustainability across all aspects of student learning. It is a supported change programme and externally assessed accreditation mark that creates an enabling environment for students and staff to put sustainability at the heart of education.

Our aim is to embed Education for Sustainable Development and climate change education into formal and informal learning to equip all students with the knowledge and skills required to help shape a more sustainable future.
